

Bolgare, October 2003

Subject : new ordering codes.

We inform you that we are gradually updating the ordering codes of our products, according to a coding system that makes easier the order processing and consequently will enable us to give you a more and more efficient service.

The new coding system is already in force for the filters series MHT, MDF, MDM, SPM, SPP, MRH-MSE, KTS e ROL; you can see it in detail on our new catalogue (both in the booklet S03 and in the pdf version available on our website www.sofima-hyd.com).

To make it easier for you :

- on our orderconfirmations you will see also the former codes under "Description"
- a new release of our list price (rev. 04/03) is now available, with pages of a.m. filter series updated accordingly (prices remain obviously unchanged).

We remain at your disposal for any further information

Best regards
