

## **REACH Compliance**

**Dear Customer,**

The European regulation (EC) 1907/2006 concerning Registration, Evaluation, Authorization and restriction of the Chemical substances (REACH) is in force since June 2007.

This new legislation has the aim to evaluate and control the risks due to chemical substances. Its purpose is to improve the protection of human health and the environment through a better and earlier identification of the chemical substances properties.

For more information, please see the "Guidelines of Automobile Industry about REACH", developed by the representatives of all the major cars manufacturers and suppliers of related industry worldwide.

This guideline is available at:

[www.acea.be/reach](http://www.acea.be/reach)

UFI FILTERS HYDRAULIC DIVISION is aware of the conditions raised by the new REACH legislation relating to the products that supplies or may supply to its customers. In particular, with regard to the articles, the only requirements of REACH are:

1. In case of intentional release of substances from the articles, a record of these substances must be kept (if produced or imported > 1 ton / year)
2. If SVHC1 substances are contained at a higher level than 0.1%, the presence of such substances must be notified to the Agency and to the customer. A preliminary list of substances candidate to be included in the list of Enc. XIV of the Rules is now available and here attached.

None of the articles that we supply to you has an intentional release of substances, consequently this condition does not apply to our products.

Concerning the substances contained in our articles, we can confirm that none of the substances present in the preliminary "candidate list" is present in our articles in quantity exceeding 0.1%.

This list is not definitive, we can anyway confirm that we are asking to all our suppliers of chemicals or preparations for confirming their intentions to pre-register their products to ensure compliance with REACH .

We will keep you informed in due time, and we confirm our commitment to inform you promptly in case we should be obliged to use such substances.

**CANDIDATE LIST (current)**

Substances	CAS Number	SVHC Classification
Anthracene	120-12-7	PBT
4,4'-Diaminodiphenylmethane	101-77-9	Cat,1 & 2 CMR
Cyclododecane	294-62-2	PBT
Cobalt dichloride	7646-79-9	Cat,1 & 2 CMR
Diarsenic pentaoxide	1303-28-2	Cat,1 & 2 CMR
Diarsenic trioxide	1327-53-3	Cat,1 & 2 CMR
Sodium dichromate dihydrate	7789-12-0	Cat,1 & 2 CMR
5-tert-butyl-2,4,6-trinitro-mxylene (musk xylene)	81-15-2	vPvB
Dibutyl Phthalate (DBP)	84-74-2	Cat,1 & 2 CMR
Bis (2-ethyl(hexyl)phthalate) (DEHP)	117-81-7	Cat,1 & 2 CMR
Benzyl butyl phthalate (BBP)	85-68-7	Cat,1 & 2 CMR
Hexabromocyclododecane (HBCDD)	25637-99-4	PBT
Alkanes, C10-13, chloro (Short Chain Chlorinated Paraffins) (SCCPs)	85535-84-8	PBT
Bis(tributyltin) oxide (TBTO)	56-35-9	PBT
Lead hydrogen arsenate	7784-40-9	Cat,1 & 2 CMR
Triethyl arsenate	15606-95-8	Cat,1 & 2 CMR

**Abbreviations:**

- Cat, 1 & 2 CMR : Category 1 & 2 carcinogen, mutagen, & toxic for reproduction -
- PBT:Persistent Bioaccumulative Toxic
- vPvB: very persistent very Bioaccumulative

**N:** This list is subject to modification.
